INTRODUCTION

This bibliography provides information on books, articles, notes, and other materials dealing with international law in Asia, broadly defined. Only English language publications are listed. In the preparation of this bibliography, good use has been made of the list of acquisitions of the Peace Palace Library, the Washington & Lee University law journal rankings, as well as book reviews in journals of international law, Asian studies, and international affairs. Most of the materials can be listed under multiple categories, but to save space each item is listed under a single category. (Edited books however may appear more than once if multiple chapters from the book are listed under different categories). Readers are advised to refer to all categories relevant to their research.
