Bibliography of P.E. de Josselin de Jong

The following bibliography is an updated version of an earlier one compiled with Professor P.E. de Josselin de Jong's help on the basis of his personal card index and published in R. de Ridder and J.A.J. Karremans (eds), *The Leiden tradition in structural anthropology; Essays in honour of P.E. de Josselin de Jong* (Leiden: Brill, 1987:64-84). As this card index was alphabetically and numerically arranged, the titles had to be re-arranged in chronological order. This work was facilitated by the fact that De Josselin de Jong kept notes of the dates of completion of his manuscripts and the dates he received them in print. The 180 entries (from 1951 to 1997) here are arranged according to year of publication, and within each year, in the order in which they were actually completed by the author. Also included is a list of unpublished works, as well as some biographical publications. To conclude the 27 PhD dissertations he officially supervised are enumerated.
