EDITORIAL

IAWA Journal invites papers on timber properties

At the most recent IAWA Business meeting in Kwangju, South Korea, surprise was expressed when the editorial policy of the IAWA Journal to incorporate not only purely wood anatomical papers was restated, and it was stressed that especially papers on structure-property relations – so important for wood science and technology in general – are welcome. It was suggested by Dr. Adya Singh that this policy should be more clearly advertised. We are delighted to do so. The IAWA Journal welcomes all contributions that relate to microscopic wood structure, be it related to plant systematics, wood identification, tree biology, tree-ring analysis, archaeology, forestry, wood technology, wood chemistry, forensic science, art history or any other field for which wood anatomical information may be relevant. In recent years there have been too few contributions on structure-property relations. IAWA members with a wood technological background are therefore invited to submit contributions to our well-circulated Journal which has a most respectable impact factor in the field of wood science and forestry. — Pieter Baas & Elisabeth Wheeler

ACKNOWLEDGEMENT OF REVIEWERS

The editors wish to thank the following colleagues for carefully reviewing manuscripts submitted for volume 19 of the IAWA Journal.

H. Abe	P. Dutielllet	J. Ohtani
