Scope

We are living in turbulent times in which we need to face global challenges connecting fields and perspectives. Complex social issues require complex, multidisciplinary approaches to deal with their complexity. In recent decades, sociocybernetics has developed as a distinct discipline that aims to meet this challenge. Sociocybernetics is concerned with applying first and second order cybernetics, the systems sciences and complexity science in the social sciences. Brill *Research Perspectives in Sociocybernetics and Complexity* (*RPSC*) disseminate advances in sociocybernetics and consolidate existing research efforts, including theory and applications. Each issue addresses developments around a specific topic; thus, besides the audience interested in developments in sociocybernetics and the complexity sciences, each issue appeals to those in other disciplines who are engaged with a particular topic. The topics addressed range from foundational issues to applications in systems modelling, the arts, social interventions, environmental problems, social work and care, public policies, and urban design, at a local or global scale. *Brill Research Perspectives in Sociocybernetics and Complexity* is an invaluable resource for scholars, policymakers and practitioners wishing to learn about the latest developments in sociocybernetics, as well as a useful resource for teachers and those studying the social sciences and related disciplines.

Ethical and Legal Conditions

Please note that submission of an article for publication in any of Brill's journals implies that you have read and agreed to Brill's Ethical and Legal Conditions. The Ethical and Legal Conditions can be found here: brill.com/downloads/conditions.pdf.

Submission

You have been invited to write a 70-100-page (30,000-40,000-word) survey article to be published as a single issue in *Brill Research Perspectives in Sociocybernetics and Complexity*. We have asked you to write the article because you are an expert on the subject and should be able to write it with authority. For this reason, we will not tell you what you should or should not include. These Guidelines are merely to help point you in the right direction in what concerns scope, level, and purpose.

Please construct your article as a short monograph containing a Table of Contents, Parts (including an Introduction and a Conclusion or Perspectives) and a list of references/bibliography. Articles should not need to be illustrated since it is primarily historiographical.

Your article should provide an overview of the subject, taking into account recent scholarship, and provide a discussion of the most important publications on the subject. The target audience should be more advanced scholars unfamiliar with the subject as well as graduate students. Readers should be able

to use the article as the starting point for researching the subject and be able to continue further research from there using the (hyperlinked) bibliography to get to the most important sources.

Your article should not be a dry, objective summing up of literature, and you should feel free to have the essay reflect your own ideas and perspectives on the subject as long as the outcome is a balanced overview of methods, theories, and approaches. Arrange your survey around major themes rather than on single works, explain very subject-specific terminology, but remember that your reader should have an advanced level of knowledge in general.

By reading your article, your audience may expect to benefit from an overview of, critical commentary on, and unique analysis of the subject and of the current state of scholarship in that area, to be directed to the essential sources, and to get ideas for new directions of research. Imagine yourself to be the reader of other issues in this series, reading into a related, possibly adjacent field of research with which you are not familiar enough to be able to find your way easily in the vast body of literature on the subject.

Your article will be peer reviewed. The purpose of the review is to solicit constructive feedback on your article in order to optimize its coverage and manner of presentation. You are expected to take this feedback into consideration, but we do not require you to adopt all points mentioned by the reviewer. Brill will optimize the discoverability of the article to ensure that it is read and cited. These critical survey articles belong to the most-cited type of articles and will ensure visibility for years to come. You are encouraged to update your article in response to new publications or new developments in the field. Updates will be clearly marked as such in the original article and will not compromise the way in which the article gets cited.

At all times, feel free to contact the journal editor, Marcel Danesi, at marcel.danesi@utoronto.ca or the Acquisitions Editor at Brill, Jason Prevost, at prevost@brill.com if you have any questions or concerns.

Submission Requirements

Authors should submit their manuscript by e-mail directly to the Editor, Marcel Danesi, at: marcel.danesi@utoronto.ca.

Language
Manuscripts should be written in English. Spelling should be consistent throughout.

Manuscript Structure

Language
RPSC publishes articles in English. Contributions should be grammatically correct and in good literary style. All spelling should be consistent.

Font

Ordinary Roman style text Arial and Times New Roman that come with Microsoft Windows are fine. For extended characters, authors should ensure that they use a Unicode friendly font such as the Brill (brill.com/about/brill-fonts).

Unicode and Non-Roman Fonts

The Editors request the use of Unicode friendly fonts only.

If you have any questions about fonts or any other issue, please contact the editor.

Length

The length requirement for *RPSC* articles is 70-100 pages (30,000-40,000-words).

Manuscript Structure

Abstract and Keywords

All manuscripts should be accompanied by an abstract in English of no more than 150 words and a list of no more than six or seven keywords.

Headings

The First Level Heading

The Second Level Heading

References

Footnotes may be used for supplemental information, but references should be given as in-text citations following APA style, with a list of references (labeled "References") at the end of the article. A list of references is required for all contributions. For guidance on in-text citation according to APA style, you may visit owl.english.purdue.edu/owl/resource/560/02/ or blog.apastyle.org/apastyle/2011/01/writing-in-text-citations-in-apa-style.html or any number of other resources on the internet.

For the References section:
– Do not use dashes for repeated author names.
– Capitalization of titles in both headline-style or sentence-style is allowed. Please follow the same capitalization style as in the original title.
– Reverse italics in titles are permitted when applicable.
– The Reference List should be presented in roman script. Use a transcribed version of the reference where necessary. The original script can be included within square brackets.

Book

Author, A.A., and Author, B. (2018). *The Title of the Book*. Location: Publisher.

Author, A.A., and Author, B. (2018). *The Title of the Book*. Location: Publisher, pp. 1–10.

Author, A. (2018). The Title of the Article. Translated by A. Translator. *Journal Title* 70 (1), pp. 1–10.

Publication

Proofs

Upon acceptance, a PDF of the article proofs will be sent to authors by e-mail to check carefully for factual and typographic errors. Authors are responsible for checking these proofs and are strongly urged to make use of the Comment & Markup toolbar to note their corrections directly on the proofs. At this stage in the production process, only minor corrections are allowed. Alterations to the original manuscript at this stage will result in considerable delay in publication and, therefore, are not accepted unless charged to the author. Proofs should be returned promptly.

E-offprints

A PDF file of the article will be supplied free of charge by the publisher to authors for personal use. Brill is a RoMEO yellow publisher. The Author retains the right to self-archive the submitted (pre-peer-review) version of the article at any time. The submitted version of an article is the author's version that has not been peer-reviewed, nor had any value added to it by Brill (such as formatting or copy editing). The Author retains the right to self-archive the accepted (peer-reviewed) version after an embargo period of 24 months. The accepted version means the version which has been accepted for publication and contains all revisions made after peer reviewing and copy editing but has not yet been typeset in the publisher's lay-out. The publisher's lay-out must not be used in any repository or on any website (brill.com/resources/authors/publishing-books-brill/self-archiving-rights).

Consent to Publish

Open Access

Should the author wish to publish the article in **Open Access** he/she can choose the **Brill Open** option. This allows for non-exclusive Open Access publication under a Creative Commons license in exchange for an Article Publication Charge (APC), upon signing a special **Brill Open Consent to Publish** Form. More information on Brill Open can be found on brill.com/brillopen.
