

Brill Evidence Select

Brill Evidence Select (EBA) gives librarians control over the development of their collections, while enabling them to address the E-Book demands of their users.

Brill Evidence Select is Brill's evidence-based acquisition model (EBA). When a library signs up to participate in the *Brill Evidence Select* program, a customized collection of Brill E-Books is made accessible to library patrons on the brill.com platform. At the end of each phase of the library's EBA plan, the 'evidence' of usage, in the form of COUNTER compliant usage statistics, is used as a key tool when deciding which Brill E-Book titles to acquire in perpetuity.

- Access is set up for the period of the agreement against a predetermined budget.
- We can tailor the available content by subject areas and years of publication.
- Usage reports are shared periodically, giving librarians complete insight into the usage of E-Books.
- After the predetermined period, E-Books are acquired in perpetuity based on usage reports.
- All purchases are on an outright purchase basis and offer the same benefits as Brill's E-Books (listed below).

All Brill E-Books are made available on www.brill.com

Features and Benefits

- All Brill E-Books can be cross-searched with Brill's journals, or users can choose to search the E-Book content only
- Outright purchase, perpetual access
- No platform or hosting fee
- No DRM
- COUNTER 4 statistics
- KBART files are available
- Free MARC 21 records
- Brill MyBook feature for licensed titles (brill.com/mybook)
- Unlimited site licenses
- E-Books indexed at chapter level by Google Scholar
- Data flows to major discovery service providers
- E-Books are priced individually

A full comparison of all E-Book purchase options can be found on our website: brill.com/page/ebookpurchaseoptions
