

Scope

Timing is ever-present in our everyday life—from the ringing sounds of the alarm clock to our ability to walk, dance, remember, and communicate with others. This intimate relationship has led scientists from different disciplines to investigate time and to explore how individuals perceive, process, and effectively use timing in their daily activities. *Timing & Time Perception (TIME)* aims to become the forum for all psychophysical, neuroimaging, pharmacological, computational, and theoretical advances on the topic of timing and time perception in humans and other animals. We envision a multidisciplinary approach to the topics covered, including the synergy of: neuroscience and philosophy for understanding the concept of time, cognitive science and artificial intelligence for adapting basic research to artificial agents, psychiatry, neurology, behavioral and computational sciences for neuro-rehabilitation and modeling of the disordered brain, to name just a few. Given the ubiquity of interval timing, this journal will host all basic studies, including interdisciplinary and multidisciplinary works on timing and time perception and serve as a forum for discussion and extension of current knowledge on the topic.

Ethical and Legal Conditions

Please note that submission of an article for publication in any of Brill's journals implies that you have read and agreed to Brill's Ethical and Legal Conditions. The Ethical and Legal Conditions can be found here: brill.com/downloads/conditions.pdf.

Policy on the Use of Animals in Research

Authors must indicate that they have complied with the standards of their country and institution which should, in general, conform with the U.S. Public Health Service's Policy on Humane Care and Use of Laboratory Animals and the Guide for the Care and Use of Laboratory Animals. Authors should describe the general policies and procedures designed to ensure the humane and appropriate use of live vertebrate animals in all aspects of their research.

Policy on the Use of Human Subjects in Research

Authors must indicate that experimental procedures involving human subjects must have been conducted in conformance with the policies and principles contained in the Federal Policy for the Protection of Human Subjects (U.S. Office of Science and Technology Policy) and in the Declaration of Helsinki.

Online Submission

Authors should submit their manuscript online via the Editorial Manager (EM) online submission system at editorialmanager.com/timebrill. First-time users of EM need to register first. Go to the website

Instructions for Authors

and click on the "Register Now" link in the login menu. Enter the information requested. When you register, select e-mail as your preferred method of contact. Upon successful registration, you will receive an e-mail message containing your Username and Password. If you should forget your Username and Password, click on the "Send Username/Password" link in the login section, and enter your first name, last name, and email address exactly as you had entered it when you registered. Your access codes will then be e-mailed to you.

Prior to submission, authors are encouraged to read the 'Instructions for Authors'. When submitting via the website, you will be guided stepwise through the creation and uploading of the various files. Authors also have the opportunity to suggest and oppose reviewers by submitting the names and (e-mail) addresses. The system automatically generates an electronic (PDF) proof, which is then used for reviewing purposes. All correspondence, including the editor's request for revision and final decision, is sent by e-mail. A revised document is uploaded in the same way as the initial submission.

Supplementary Media / Data Files

To support and enhance your manuscript, *TIME* accepts electronic supplementary material, including supporting applications, high-resolution images, background datasets, sound or video clips, large appendices, data tables and other items that cannot be included in the article PDF itself. Authors should submit the material in electronic format together with the other manuscript files and supply a concise and descriptive caption for each file. In order to ensure that your submitted material is directly usable, please provide the data in one of the broadly accepted file formats for video, audio, etc. and limit the file size (e.g., for video: max. 3 GB). Supplementary files supplied will be published online at FigShare (www.figshare.com), to which reference is made in the published article on Brill Online Books and Journals, and vice versa.

File Formats

Most popular formats are allowed for the initial submission, as long as an editable source file (e.g., a Word file) is included. Figures must be in digital format. Please refer to 'Figures' in this document for more detailed instructions.

Contact Address

For any questions or problems relating to your manuscript please contact the Editors (Dr. Argiro Vataki, Prof. Warren H. Meck, Dr. Hedderik van Rijn) at: timingtimeperception@gmail.com. For eventual questions about the EM website, authors can also contact Brill's EM Support Department at: em@brill.com.

Submission Requirements

Types of Contribution

- Full Theoretical, Research, Review, and Replication articles
- Brief Commentaries, Letters to the Editor, Brief Communications reporting original empirical findings, major theoretical advances or crucial developments that warrant rapid communication to the scientific community
- Proposals for special issues on a new and/or important area (or issue) in the field (must be communicated with one of the Editors-in-Chief)

Language

Manuscripts should be written in English. Spelling (British or American) should be consistent throughout. As no language editing facilities are provided by the journal, the author should ensure that the submitted manuscript is publication ready.

Length

Full articles need not be any specific length, but authors must confine themselves to the maximum required by the subject matter. Brief contributions must be no more than 3,000 words long excluding title, author affiliations, acknowledgments, references, and figures/tables (this word limit must be strictly observed due to page limits - note that the 3,000 words does include the abstract). Please provide a word count on the title page.

Manuscript Format and Structure

Format

Contributions should be typed, 1.5 or double line spacing and wide margins throughout.

Italics should only be used for scientific species names, words that need to be emphasized (no italics for: e.g., i.e., etc., cf.) and for mathematical and statistical variables such as p , F , U , T , N , r , but not for SD (standard deviation), SE (standard error), DF (degrees of freedom), and NS (non significant).

Bold should only be used in exceptional cases of extra emphasis or in some formulas, and for the title and authors' names of the manuscript.

Capitals should only be used for title and headings, first letters of sentences, first letters proper names, and first letters of specific words (e.g., tables, figures, experiments) that should be emphasized; small capitals for words that should be printed in capitals.

Instructions for Authors

Headings

Headings should be numbered consequently, e.g., **2.** for the main heading, *2.1.* for the second level heading, and *2.1.1.* for the third level heading.

Main headings are in **bold** (Introduction, Material and Methods, Results, Discussion, References or other variants if appropriate), flush left, capitals for the first letter of main words, separated by white lines from text.

Second level headings in *italics*, flush left, capitals for the first letter of main words, separated by white lines from text.

Third level headings in *italics*, flush left, capitals for the first letter of main words, separated by a white line from the preceding text; the following text starts on the next line.

Title Page

The first page of an article should contain the title of the paper, the name(s) and address(es) of the author(s), a short title (not exceeding 50 characters, spaces included), and the name, e-mail address, and postal address of the author to whom correspondence and proofs should be sent.

The manuscript title should be given in bold, roman type (**The Title of the Manuscript**), with capitals for the first letter of main words and should be as brief and informative as possible.

Authors' names should be in bold, roman type as normally used by the author, first name followed by family name, names separated by commas and between the last two names by 'and', references to institutes and addresses as superscripts (e.g., ¹ or ^{1,2} in ascending order).

Affiliation: the institute where the work has been done should be indicated under the authors in roman type, first letters of major words in capitals. If the authors are based at different organizations this should be indicated in superscript in front of the institute (e.g., ¹Centre for...—corresponding to the references under 'authors').

E-mail addresses of corresponding authors may be added as footnotes.

Abstract and Keywords

Each article should be accompanied by an abstract in English, which should mention all the principal facts and conclusions set forth in the paper. The abstract may be up to 250 words in length.

Three to eight keywords should be given. Keywords should be comma separated.

Introduction

State the objectives of the work and provide an adequate background.

Instructions for Authors

Material and Methods

Provide sufficient detail to allow the work to be reproduced. Methods already published should be indicated by a reference: only relevant modifications should be described. This section should be in a smaller font than the rest of the paper.

Results

Results should be clear and concise.

Discussion

The main conclusions of the study should be presented in detail and in relation to existing knowledge.

Acknowledgments

Collate acknowledgments in a separate section at the end of the article before the references. The title of this section should be in italics, flush left. List here those individuals who provided help during the research or the funding source that supported this research and/or the researchers.

References

Please ensure that every reference cited in the text is also present in the reference list (and vice versa). References cited in the abstract must be given in full. Unpublished results and personal communications can be used in the text. If included in the reference list, they should follow the APA reference style and include a substitution of the publication date with either 'Unpublished results' or 'Personal communication'. Citation of a reference as 'in press' implies that the item has been accepted for publication.

Add DOI whenever available.

Citations in the text should follow the referencing style used by the APA, but a limit of **two** to the number of author names applies, to minimize the space needed.

For the same reason, titles of publications in the *reference list* may and will be abbreviated. The proper abbreviations to use can be found here: ncbi.nlm.nih.gov/nlmcatalog/journals. References should be arranged alphabetically and, if necessary, sorted chronologically. More than one reference from the same author(s) in the same year must be identified by the letters 'a', 'b', 'c', etc., placed after the year of publication. The same applies to publications with three or more authors which have the same first author and publication year.

Example with two authors

Allman and Meck (2012): *Citation in running text.*

(Allman & Meck, 2012): *Citation in parenthetical format and in tables.*

Instructions for Authors

Allman, M. J., & Meck, W. H. (2012). Pathophysiological distortions in time perception and timed performance. *Brain*, 135, 656–677: *Citation in reference list*. DOI: 10.1163/22134468-00002044.

Example with **three** or more authors

Brochard et al. (2003): *Citation in running text*.

(Brochard et al., 2003): *Citation in parenthetical format*.

Brochard, R., Abecasis, D., Potter, D., Ragot, R., & Drake, C. (2003). The "ticktock" of our interval clock: Direct brain evidence of subjective accents in isochronous sequences. *Psychol. Sci.*, 14, 362–366: *Citation in reference list*. DOI: 10.1163/22134468-00002045.

For more details, refer to the *Publication Manual of the American Psychological Association*, Sixth Edition, ISBN 978-1-4338-0561-5.

Mathematics

Detailed mathematical discussion should be placed in an appendix, to be published online as Supplementary Material (see below). Units of measurement, abbreviations, and symbols should follow the international system of units (SI). Equations and formulae should be numbered consecutively with Arabic numerals in parentheses on the right-hand side of the page.

Figures

References to figures should consist of the complete word only at the beginning of a sentence and in the figure captions; otherwise the abbreviations "Fig." or "Figs" are used. Figures should be submitted as separate source files in .eps, .tif, or .jpg format, in a size suitable for the typesetting area of the journal, which is 120 x 190 mm. The resolution of these files should be at least 300 dpi for half-tone figures, and 600 dpi for line drawings. The text in a figure must be legible, and should not be smaller than corps 7. The size, style, and font of this lettering for any text in a figure should be the same for all figures in the manuscript. Greyscale graphics must be provided as monochrome images. There is no charge for full colour images or figures in either the print or electronic edition. To guarantee good resolution in printing, color figures must be original TIF or EPS (no PDF) files with a minimal resolution of 300 dpi for half-tone figures, and 600 dpi for line drawings and in full color (i.e., CMYK and not RGB format). Diagrams, maps, drawings, charts, and photographs should be free of charge and copyright, or the author has to obtain permission for publication from the original copyright owner(s). A list of figure captions should be added on a separate page at the end of the manuscript.

Tables

References to tables should consist of the complete word, first letter capital (also in the middle of a sentence or in brackets) + number in Arabic numerals: Table 7 or (Table 7). Tables should be kept as

Instructions for Authors

simple as possible. The title should give all details that are needed to understand the table except obvious footnotes. Tables should be included at the end of the manuscript.

Abbreviations

Abbreviations should be followed by '.' unless the abbreviation is written with the last letter of the original word at the end position (thus: i.e., – e.g., – cf. – etc. but Eds – Dr – edn – Figs) – measures (such as mm, cm, m, s, l) without '.'. The word 'equation' should not be abbreviated.

Quotations

Use single *quotation marks* (') for isolated words or conceptions, double (") for literal quotes.

Footnotes

If footnotes are needed, number them consecutively throughout the article, using superscript Arabic numbers. Many word processors build footnotes into the text, and this feature may be used. Should this not be the case, indicate the position of footnotes in the text and present the footnotes themselves separately at the end of the article.

Copyright

The use of general descriptive names, trademarks, etc., in this publication, even if the former are not specifically identified, is not to be taken as a sign that such names are exempt from the relevant protective Instructions to Authors' laws and regulations and may accordingly be used freely by anyone.

Publication

Proofs

Upon acceptance, a PDF of the article proofs will be sent to each author by e-mail to check carefully for factual and typographic errors. Authors are responsible for checking these proofs and are strongly urged to make use of Comment & Markup tools to note their corrections directly on the proofs. At this stage in the production process only minor corrections are allowed. Alterations to the original manuscript at this stage will result in considerable delay in publication and, therefore, are not accepted unless charged to the author. Proofs should be corrected and returned to the managing editor as quickly as possible.

E-offprints

A PDF file of the article will be supplied free of charge by the publisher to the author of articles or review for personal use. Brill is a RoMEO yellow publisher. The Author retains the right to self-archive the submitted (pre-peer-review) version of the article at any time. The submitted version of an article is the author's version that has not been peer-reviewed, nor had any value added to it by Brill (such as formatting or copy editing). The Author retains the right to self-archive the accepted (peer-reviewed)

Instructions for Authors

version after an embargo period of 12 months. The accepted version means the version which has been accepted for publication and contains all revisions made after peer reviewing and copy editing, but has not yet been typeset in the publisher's lay-out. The publisher's lay-out must not be used in any repository or on any website (brill.com/resources/authors/publishing-books-brill/self-archiving-rights).

Consent to Publish

Transfer of Copyright

By submitting a manuscript, the author agrees that the copyright for the article is transferred to the publisher if and when the article is accepted for publication. For that purpose the author needs to sign the **Consent to Publish form**, which will be sent with the first proofs of the manuscript.

Open Access

Should the author wish to publish the article in **Open Access** he/she can choose the **Brill Open** option. This allows for non-exclusive Open Access publication under a Creative Commons license in exchange for an Article Publication Charge (APC), upon signing a special **Brill Open Consent to Publish Form**. More information on Brill Open can be found on brill.com/brillopen.
