China and International Fisheries Law and Policy

Author: Guifang Xue

This book deals with China's response to international fisheries law and policy as envisaged in the LOSC framework and post-LOSC fisheries instruments. A substantial effort was made to examine the major areas of China's national action on legislative harmonisation and policy adjustment to implement these instruments. China's regional fisheries cooperation, in the form of bilateral agreements with Japan, South Korea and Vietnam, is evaluated to identify the progress already achieved and the problems that remain to be solved in managing the shared fish stocks between these maritime neighbours. As the first monograph of its kind dealing with the complex issue of the global fisheries crisis and China's fisheries management practice over a significant period of time, the book builds a bridge between China and the world for a better understanding of Chinese fisheries management. It will be of great value to academics, professionals, and policy-makers alike.
