About PDFReactor

RealObjects PDFReactor is a powerful formatting processor for converting HTML and XML documents into PDF. It uses Cascading Style Sheets (CSS) to define page layout and styles. The server-side tool enables a great variety of applications in the fields of ERP, eCommerce and Electronic Publishing.

PDFReactor supports HTML5, CSS3 and JavaScript.

It allows you to dynamically generate PDF documents such as invoices, delivery notes and shipping documents on-the-fly. PDFReactor allows you to easily add server-based PDF generation functionality to your application or service. Since PDFReactor runs on a server, the end-user in general does not need any software other than a PDF viewer.

The Hanse in Medieval and Early Modern Europe

Volume Editors: Justyna Wubs-Mrozewicz and Stuart Jenks

The Hanse, an organization of towns and traders in medieval and early modern Europe, was a unique phenomenon. At the same time, it was embedded in the northern European urban mercantile culture. The contributions in this volume therefore seek to highlight the atypical of the Hanse, and place them in a wider context of common roots, influences and parallel developments. New research is presented on the origin and growth of the Hanse, the organization of trade, its history, interaction with non-Hansards and transitions in the Hanse in the early modern period. Moreover, the historiography of the Hanse, problems of source criticism and possibilities for further research are discussed. The volume is an inspiring guide to Hanse studies. Contributors are Carsten Jahnke, Edda Frankot, Sofia Gustafsson, James M. Murray, Mike Burdett, Marie-Louise Pelus-Kaplan, Stuart Jenks, and Justyna Wubs-Mrozewicz.

Readership

All interested in the history of the Hanse, economic history and the history of institutions (NIE) in medieval and early modern Europe; specialists, post-graduate students, institutes, academic libraries.

Pages: 304 pp.
