

BRILL *Over three centuries of scholarly publishing*

Monumenta Cartographica Neerlandica Volume IX (3 Vols.)

Author: Günter Schilder

This is the last and final volume in the series *Monumenta Cartographica Neerlandica*. This series is the result of the author's investigations, carried out during the past thirty years in numerous Dutch and foreign collections.

In this way rare cartographic material is now more easily accessible. The work is monumental in every respect, and it is indispensable for private as well as public reference collections.

This volume focuses exclusively on the work of Hessel Gerritsz. (c. 1581-1632), who ranks among the most important and influential cartographers of the early-seventeenth-century Amsterdam. He started his career in Willem Jansz. Blaeu's workshop. About 1608 he established himself as an independent engraver, mapmaker and printer. A selection of his maps has been described and reproduced in full size and his position as chart-maker of the Dutch East and West India Company is discussed in detail.

To present an easier access to the whole series, a general index on names, maps and a dozen thematic subjects of all the nine volumes has been compiled. This index volume is included.

Readership

The book facilitates access to rare printed Flemish and Dutch maps and charts of the sixteenth and seventeenth centuries, and where possible the maps are published in full-sized facsimile. In this way rare cartographic material is now more easily accessible to interested cartographers, historians, art historians, and others.
