CHAPTER FIFTEEN

SITE CATALOGUE

This Site Catalogue presents the entire array of Chalcolithic and EB I sites on which the research is based. It includes the information on all surveys and excavations in the region, including unpublished sites that were found while this research was in progress. Almost all sites were revisited, and the information given here is the most accurate available for the researcher. The low probability scored sites are not fully presented here but appear in Table 15.1 at the end of the Catalogue. The map in Figure 15.1 shows all the site locations described here. For a brief explanation of the nature of each term used in the Catalogue see Chapter 4. All the Chalcolithic and EB I pottery references given in each site description apply to the pottery figures in Chapter 8.
