Aims & Scope
The European Journal of Health Law focuses on the development of health law in Europe: national, comparative and international. The exchange of views between health lawyers in Europe is encouraged. The journal will publish information about activities of European and other international organizations in the field of health law. Discussions about ethical questions with legal implications will be welcome. National legislation, court decisions and other relevant national material with international implications will also be dealt with.

Each issue of the European Journal of Health Law contains articles (with abstracts), selected legislation, judicial decisions, a chronicle of events, and book reviews. Papers for consideration should be addressed to B. Kaldenbach at: kaldenbach@brill.nl.
