An Integrated Bibliography

Compiled by
KIYOMI MORIOKA AND WILLIAM H. NEWELL

This bibliography is derived from three sources: (1) References submitted by the authors of articles in this book. Under this heading are a few publications in non-Japanese languages; (2) Titles of important books or articles on the sociology of religion in Japan, which have been submitted by contributors even when they do not deal with the essays in this volume; (3) Titles collected by the guest editors of this book to do with the history of the sociology of religion in Japan written in the Japanese language. It is hoped that non-Japanese students of religious sociology will be able to obtain any Japanese title to do with their general interest in religion and have them translated himself in order to include Japanese material in general religious studies, even when he may not know the total Japanese field himself.

Abe, Shigeo
