Subject Index to Volume 25 Supplement

Abstracts of the 13th International Multisensory Research Forum,

A
accommodation, 79
action, 75, 128
action observation, 80
action sounds, 217
acuity, 42, 82
adaptive behaviour, 55
aesthetic perception, 80
aesthetic preferences, 131
affective valence, 127
affordances, 99
age-related, 23
ageing, 155, 210
agency, 214
aging, 20, 153
allocentric, 18
apparent motion, 26
arm crossing, 35
arousal, 127
asynchrony judgment, 48
asynchrony, 96
atmospherics, 102
attention, 6, 20, 54, 59, 75, 121, 146, 148, 154, 177, 196, 203
attentional orienting, 16
attractiveness, 93
audio, 91
audio–tactile combinaison, 212
audio–tactile interactions, 217
audio–visual, 104, 121, 132, 148, 196, 210
audio–visual blur, 181
audio–visual content, 111
audio–visual facilitation, 160
audio–visual integration, 53, 194
audio–visual presentation, 22
audio–visual search, 181
audio–visual training, 157
audiovisual, 40, 44, 49, 96, 105, 123, 168
audiovisual binding, 178
audiovisual cues in conversations, 176
audiovisual illusion, 106
audiovisual integration, 86, 130
audiovisual interaction, 76, 175
audiovisual perception of synchrony, 141
audiovisual spatial attention, 16
audiovisual speech, 164
audiovisual stimuli, 159
audiovisual synchrony, 29
audition, 24, 56
auditory, 5, 32, 45, 94, 107, 133, 153, 198
auditory attention, 55
auditory body-representation, 217
auditory cortex, 180
auditory perception, 39
auditory pitch, 70

© Koninklijke Brill NV, Leiden, 2012
DOI:10.1163/187847612X649665
auditory rehabilitation, 157
auditory–visual, 89
Autism Spectrum Disorder, 63
autism spectrum disorders, 44
awareness, 148

B
balance, 155
Bayesian, 26
Bayesian modelling, 138
binocular disparity, 31, 76
binocular rivalry, 118, 171
blind, 51, 119
blindness, 18, 140, 191, 222
bodily illusion, 33
bodily self, 113
body, 87
body ownership, 214
body representation, 42, 134
body representations, 41, 135
body schema, 126, 187
body-ownership, 197
brain mechanism, 57
brain oscillations, 152

C
calibration, 132
case study, 186
categorical perception, 42
categorization, 65
channels, 40
children, 203
cognitive development, 176
colour associations, 108
competition, 178
computational, 179
computational models, 16
congruence, 25, 60
congruency, 102, 178
connectivity, 5, 12
connotative meaning, 67, 71
consumer, 199
consumer research, 66
context, 164
continuous flash suppression, 30
contrast, 177
convergence, 79
correspondences, 224
cortex, 56
cortical integration, 115
cross-modal, 8, 34, 39, 110, 133, 180, 191
cross-modal integration, 14
cross-modal mapping, 65
cross-modal transfer, 30
cross-sensory, 8
cross-sensory correspondences, 67
‘crossed-hands effect’, 41
crossmodal, 7, 54, 59
crossmodal association learning, 117
crossmodal binding, 186
crossmodal correspondence, 70, 89
crossmodal correspondences, 44, 68, 72, 73, 127, 174
crossmodal enhancement, 193
crossmodal integration, 26
crossmodal interaction, 156
crossmodal interactions, 24, 149
crossmodal processing, 136
crossmodal size judgment, 116
crossmodal stimulation, 88
cue combination, 138
curve, 28
cutlery, 199

dance, 45, 188
delayed auditory feedback, 48
delayed visual feedback, 197
depth perception, 116
detection theory, 100
development, 38, 87, 133, 200, 202, 205
developmental coordination disorder, 75
developmental dyspraxia, 63
